SAMPLE(S) SUBMITTED FOR TEST AND IDENTIFIED BY CUSTOMER AS:

One, Free Motion: "Capella X 24/7 CFM124"

TEST(S) AS REQUESTED BY CUSTOMER:

BS 5459-2: 2000 + A2: 2008

RESULT:

Pass°

°Excluding Clauses A8 & 5.

Technical report references marked * indicate this report is supplementary to the previous report with the same reference.

FIRA International is a UKAS TESTING Laboratory No. 0174

Tests marked "Not UKAS Accredited" in this Report are not included in the UKAS Accreditation Schedule for our laboratory.

Opinions and interpretations expressed herein are outside the scope of UKAS Accreditation.

This Report relates to the sample(s) submitted for test and no others. Additions, deletions or alterations are not permitted.

Test reports are given to the client in confidence and may only be reproduced in whole or in part with written permission from FIRA International Limited. Note that the words "**tested by FIRA International**" may be used in subsequent publicity for the product; "approved" must **not** be used.

Tests are carried out on the understanding that neither FIRA International Limited nor its officers can accept any legal responsibility for information or advice given or opinions expressed whether in response to specific enquiries or otherwise. This Report is given subject to the Terms of Business of FIRA International Limited which are available at www.fira.co.uk/images/FIRA-International-Limited-Standard-Terms-of-Business-2018.pdf

When a statement of conformity to a test standard is reported the test result(s) are unlikely to be the "true" result(s) due to measurement uncertainty. When the sample is tested under the criteria and conditions as defined in the method and the measured result is outside of the upper/lower acceptance limit and corrected for uncertainty at 95% probability, the risk of a false accept/reject is ≤2.5%. These results will be reported as Pass/Fail. If the test result(s) obtained under the same conditions is close to the upper/lower acceptance limit and could be either side of the accept/reject threshold these results will be reported with a conformance probability.

TECHNICAL REPORT

DESCRIPTION

Item: Free Motion: "Capella X 24/7 CFM124"

Supplied by: **KINNARPS AB**

Number of Photos: Four

Qty	Item	Material
2	Arms	100mm Plastic
1	Back Frame	40mm Metal
1	Seat Frame	40mm Metal
5	Castors	60mm Plastic
1	Castor Frame	600mm Ø Metal
1	Height Adjustment Mechanism	Ø Metal / Plastic

All dimensions are approximate.

Number of seating positions: 1

Number of seating positions tested: 1

Weight of sample: 15.7kg

PRECONDITIONING AND MOISTURE CONTENT

FIRA International cannot validate date of manufacture and therefore it is assumed that at least 4 weeks has elapsed between date of manufacture and delivery to FIRA International.

Unless otherwise stated on the first page of this report the sample was stored in indoor ambient conditions for at least the minimum duration as required by this standard prior to test.

Wherever possible timber moisture content is verified prior to test. Where this is not possible the moisture content is assumed to be in the range 8 – 12 %.

TECHNICAL REPORT

BS 5459-2: 2000 + A2: 2008 – Specification for Performance Requirements and Tests for Office Furniture

The tests required were carried out in accordance with the standard. Where applicable details of the loads applied, and their positions of application are retained at FIRA International and are available on request.

Item: Free Motion: “Capella X 24/7 CFM124”

Initial Inspection: No apparent faults

Clause	Test	Result
	(Clause Ref BS 5459-2: 2000 + A2: 2008)	
A.6.2.1	Forwards overturning.	Pass
A.6.2.1	Sideways overturning for chairs without arms.	N/A
A.6.2.2	Sideways overturning for armchairs.	Pass
A.6.3.1	Rearwards overturning.	Pass
A.6.3.2	Accidental rearward overturning.	Pass
A.6.4	Rearwards overturning of tilting and reclining chairs.	Pass
A.5.1	Fore-and-aft safety test.	Pass
A.5.2	Seat impact.	Pass

TECHNICAL REPORT

COMMENTS

The Free Motion: "Capella X 24/7 CFM124", as previously described, had been awarded a safe failure for the fore-and-aft safety test to BS 5459-2: 2000 +A2: 2008. After surpassing 120,000 cycles of a required 500,000 cycles, it was noted that a clip had become detached from the backrest. The chair subsequently met the safe failure criteria.

CONCLUSION

The Free Motion: "Capella X 24/7 CFM124", as previously described, successfully satisfied the applicable test requirements of BS 5459-2: 2000 +A2: 2008 - Excluding Clauses A8 & 5.

Tested by: S Crisp & L Haines

Reported by: B Southam

Approved by: L Haines
